COMPANY PROFILE

AZAFRICA.com

Africa's premier web & software development company

ABOUT US

AZAFRICA.COM is a fully Namibian owned web and software development company whose main business objective is to capacity-build local and international companies and institutions with cost-effective, world-class internet related applications.

We have an impressive portfolio of content management system, intranet and software solutions we have developed for a broad range of clients e.g. law firms, private institutions, educational institutions, banking institutions, non-governmental organizations, individuals and government agencies
We have been awarded 5 star by the prestigious SA Web Awards for the design of some of our websites.

WEB DEVELOPMENT & APPLICATIONS

AZAFRICA.COM provides pre-packaged and custom developed websites for various organizations.

AZAFRICA.COM has in depth experience at coming up with web based solutions for any business. Most of our clients have realized that there are cost saving by moving applications to the web so they can be accessed anywhere from a browser.

SOFTWARE, INTRANET & DATABASE DEVELOPMENT

AZAFRICA.COM staff has a wide range of experience in developing crossing platform, software application, gaming, database and intranets. Our project managers and developers are some of the best in the industry.
Customised Software, Databases and Intranet is an empowerment tool of real significance. These will be a key component for a company's competitive strategy. A well designed and maintained Software, Databases or Intranet saves people time, provides for better communications, and boost output.

WEB HOSTING

AZAFRICA.COM hosting plans, rated #1 by Web Host Directory are ideal for most individuals and small, medium as well as large businesses. We're the affordable, reliable place to host your site -- with no ad banners or pop-ups, 99,99 uptime guaranteed and 24/7 support.

WEB MAINTENANCE

AZAFRICA.COM provides website management and maintenance services for business websites. Our team of professional website designers, content developers and web and software developers strongly believe in the evolution of business websites.

Website maintenance services may include:

- Essential HTML and image management
- Database and content management for dynamic websites
- Web sever administration and hosting services
- Distribution of email marketing campaigns
- Website development updates using a wide variety of web technologies

ONLINE MARKETING

AZAFRICA designs strategic online marketing solutions for websites.

Without online marketing services such as database marketing, search engine registration and optimization, or other effective traffic strategies, the visitor count is usually very low. And the truth is, if no one sees a website, there really is no point in having one!

CONTENT MANAGEMENT SYSTEMS

A Content Management System or CMS offers the ability for you or your employees to update information on your website without having to learn HTML or complex programming languages. All content can be updated via a series of easy-to-use forms and then served dynamically out of a database to your site.

In addition, a CMS will help to control the cost of maintaining your website, as much of the day-to-day upkeep can be handled in-house.

CUSTOM GRAPHICS/ GUI

AZAFRICA knows that the best software or web site is not good enough unless it is presented well.
AZAFRICA.COM has evolved its custom graphics department to keep up with the more and more complicated elements that web sites and application require to be competitive. Web Site Art, Application Graphics, Flash Presentation, Logo, Business Cards, Letter Head & Brochures.

DOMAIN REGISTRATION

AZAFRICA.COM offers affordable domain registration.

INTERNET ACCESS

AZAFRICA.COM offers the small, medium and large business with a wide range of products and services that address the most demanding of needs. Whether your company requires a single point connectivity solution or a complex multi point network solution, AZAFRICA.COM is able to provide your business with a internet connection solution best suited for your needs.

IT TRAINING

We provide a wide range of Customized Information Technology Training Courses.

IN HOUSE TECHNOLOGIES

- Programming/Scripting: C, C++, Java, VB, VBScript, Python, Perl, XML, PHP, ASP
- Database: Oracle, Sybase, Postgres, MS SQL Server, MySQL
